CLOSING SESSION AND FAREWELL

"CO-CREATION OF KNOWLEDGE"  
ROOM

## ORGANISING TEAM

The Agroecology Europe Youth Network is a network of young Europeans committed to the promotion of agroecology. With about 30 members from several European countries (Italy, Germany, UK, Croatia, Hungary, France, etc.) the network aims to mobilise and integrate youth in the agroecological movement and in the renewal of the European agricultural sector. We take action through the mapping of agroecological initiatives across Europe and by organising activities such as participatory workshops and forums.

Sillage is a young movement that acts for the transformation of the agricultural and food system towards an agroecological, diversified and fair model. We take action through various awareness-raising projects (comic book, podcast), trainings, advocacy for student collective catering and also field trips.

European Youth Initiative for the Future of our Food and Agriculture is a group of young Europeans who have started taking action for our future in regard to agriculture and food systems issues. We know our generation will face big challenges in the future like climate change, soil erosion, food quality... and we don't want to wait for it. We have to act now! That's why, based on motivation and positive attitude, we have created a network for young people aged up to 36 years old and living in Europe.

## SPONSORS
