

1. In **what conditions** can digital technologies contribute in advancing the food sovereignty project embedded in agroecology? Or on the contrary, will they serve to erase peasant knowledge and their autonomy to integrate them into global economy, expanding large-scale industrial agriculture?
2. How **bridges** can be built to improve exchanges between researchers and **formal knowledge with the traditional knowledge** and innovation practices at the hand of farmers?
3. From a feminist perspective, how digital technologies should take **an intersectional perspective** in order to avoid exclusion and discrimination by age, gender or race?

SESSION 6: Agroecology and Digitalisation
