The 13th of September 2021

Object: Apply the position of board member for "CARBONE FERTILE, Centre national d'agroécologie"

CARBONE FERTILE is a French national non-profit association founded in 2021 by several French SME or associations directly invested in a daily work with farmers, to promote agroecology and to support its implementation. <https://carbonefertile.fr/>

We response to your apply with this legal entity represented by Alain Canet and Vincent Levavasseur.

The first aim of our association is to federate many members of the French and European network of agroecology to enhance common actions and disseminations. It's also the place to create partnerships with other companies or associations who are not directly involved in agroecology but who want to bring their skills and knowledge to support agroecology spreading. Due to common work, CARBONE FERTILE wants to be a place of innovation in agriculture and further the existing and future projects of its members.

Our second aim is to place carbon as the main issue of agricultural transition to provide soil fertility, biodiversity or better food quality. Face to the good intentions to protect the earth, we want to be able to address to any member of the society to explain clearly the need of an efficient agronomic approach. By placing carbon at the heart, we want to reconcile farmers, environmentalist, policy makers and citizens and bring the proves that they all follow a common goal.

Third, we want to bring gaps between all stakeholders, from field to the fork, to enhance the awareness of the urge necessity to change agricultural approach. Learning from each other is for us a key point to change our mind. This aspect brings to light that contributions of social sciences are in our toolbox, both because it's of huge importance to convince, but also because agroecology serve global human welfare at the end.

To achieve these goals, CARBONE FERTILE would be honored to be an active member of AGROECOLY EUROPE. And to embody this involvement, we want to candidate to the board member elections.

This opportunity could be an excellent way to share and work with all involved agroecology partners in Europe and thus bring my contribution to the outreach of AGROECOLOGY EUROPE.

Indeed, we are conscious that take part of this institution is the best way to co-develop a strong agroecological voice and increase the impacts of our common goals.

By apply to the board, we want first to learn from each other to highlight the best in my country and also bring the knowledge of the French network.

Our objective is to strengthen the European network for him to be more relevant to win calls for European institutions projects and to boost agroecology research and its support action capacity.

We also want to contribute to focus AGROECOLOGY EUROPE actions and communications on the carbon, its storage efficiency and its importance to accelerate agroecological principles adoption.

In the board, we also want to emphasize the social innovation aspect of agroecology because if we need to take care of the soil first, we also need to take care of people as first prophet and recipients of AGROECOLOGY EUROPE work.

Finally, I want to showcase my wish to work with a bottom-up approach, especially for technical issues but also for any aspect that AGROECOLOGY EUROPE will choose to develop. First we are convinced that it's one of the strength of my daily work, but also we think that AGROECOLOGY EUROPE must continue to capitalize on the experience and expertise of local agroecological practitioners.

We hope you will consider our application carefully,

Alain Canet
